

14th annual Boone Green and Solar Homes Tour 2009

WHEN: Saturday Oct 3, 2009

WHERE: The Cooperative Extension Agricultural Conference Center, 971 W King St. Boone, NC

TIME: 8am - 4pm

FEES: \$20 per person (\$10 for students/ NCSEA members) includes breakfast and lunch

To Register, email Amy Metsker at: asuses@gmail.com

This tour is part of the North Carolina Sustainable Energy Association's annual Green Building & Solar Tour hosted by the ASU Sustainable Energy Society.

Tour participants will take a guided tour of about 5 green homes as well as renewable energy sites in the Boone area. This is a great opportunity to learn about sustainable options for renewable energy technology, alternative building materials, green building certifications, energy efficiency, and much more!

We will visit many high performance houses, including a 1,600 sq ft dwell box made of recycled shipping

containers (see photo at right). The homes will show examples of passive solar design, solar thermal water heating, ground source heat pumps, alternative building materials, LEED and Energy Star Certifications and much more.

We will have speakers during lunch to further educate about green building, energy efficiency, and renewable energy. We are delighted to have Crystal Simmons speak about the new Broyhill Wind Turbine Project installed by the ASU Renewable Energy Initiative (see photo below).

For more info contact Amy Metsker at asuses@gmail.com or check the website at Asuses.appstate.edu.

Hope to see you there!!
